

Tensabright™

A high performance reflective belt that can offer superior visibility in poor weather or lighting conditions. Tensabright™ is florescent during day, reflective during the night.

Exclusive to Tensator, Tensabright™ increases safety and visibility in the work place. This high visibility retractable belt, helps avoid costly accidents.

Benefits:

- ➔ High visibility in poor weather and lighting conditions.
- ➔ Cost effective way to create a safer working environment.
- ➔ Visible in all weather conditions.
- ➔ Visible at all times of the day, including in the dark.
- ➔ Quickly and efficiently restrict access to areas or hazards.

Features:

- ➔ Micro-prism film retro-reflective base material, which is seven times brighter than alternative glass bead technology - especially when wet.
- ➔ Returns light to original light source ensuring maximum visibility.
- ➔ At 500meters away its light intensity is 700 – 1000 candelas.
- ➔ Uses patented Tensator centrifugal cassette braking system.
- ➔ Suitable for outdoor use, but should only be operated between -10°C and +40°C.
- ➔ Compatible with all Tensabarrier® products and APG.
- ➔ Encapsulated for enhanced reflective performance, wipe clean surface and kerosene resistant.
- ➔ Available in lime colour.
- ➔ Available in 2.45m, 4.6m and 7.7m.
